

# Hair Loss

## TREATMENT FOR HAIR LOSS

Mesotherapy is a baldness treatment alternative that allows both men and women with hair regrowth. It can also delay male pattern baldness.

### MEDICAL SYMPTOM & SIGN INFORMATION:

Both men and women suffer from thinning hair and hair loss thus making them seek treatment for hair loss. Male pattern baldness is also a serious concern for a large portion of the population. Each of these conditions fall under the medical term "alopecia." Some of the common signs and symptoms of alopecia include...

- **Balding**
- **Patchy Hair Loss**
- **Progressive Thinning of the Hair**

Some studies have shown that the naturally-occurring dehydrotestosterone (DHT) hormone is one of the factors causing hair loss.

### Mesotherapy Treatment Description:

Techniques used in mesotherapy treatment for hair loss are derived from mesotherapy. You will hear about proprietary approaches such as Mesoplasty® or MesoHair, which have both shown positive results with hair re-growth in both men and women.

Using a specialized cocktail, your scalp is essentially given a vitamin boost which can improve the blood circulation in this area. Better circulation allows your hair follicles to be better nourished...all of which can improve hair re-growth.

With mesotherapy, treatment for hair loss will likely be done via injection gun as opposed to the mesotherapist injecting by hand. This helps to make mesotherapy treatment for hair loss faster as well as potentially less painful.

Over time, the mesotherapy solution will neutralize the DHT hormone, causing hair to grow again.

You may need as many as five sessions of this mesotherapy treatment for hair loss over a period of four to six months before you see significant results. Your mesotherapist will let you know if your particular case requires more or less treatment.

### Maintenance

Mesotherapy can potentially eliminate the need for hair transplant surgery. However, remember that mesotherapy treatments work best when toxins are eliminated from the diet and you're following a healthy exercise program.
